EXPERIMENT ASSESSMENT

ACADEMIC YEAR 2025-26

Course: MDM: Introduction to web technology

Course code: 2344212

Year: SE SEM: IV

Experiment No. 8
AIM:- Building a Simple Counter App using React Hooks. Use React Hooks (useState, useEffect) to manage state and side effects.
Name: Gauri Desai
Roll Number: 03
Date of Performance:
Date of Submission:

```
import React, { useState, useEffect } from "react";

function App() {
  const [count, setCount] = useState(0);

  useEffect(() => {
    document.title = `Counter: ${count}`;
  }, [count]);

  const increment = () => setCount(prev => prev + 1);
  const decrement = () => setCount(prev => prev - 1);
  const reset = () => setCount(0);

  return (
    <div
      style={{
        display: "flex",
        flexDirection: "column",
        alignItems: "center",
        justifyContent: "center",
        height: "100vh",
        fontFamily: "Arial, sans-serif",
      }}
    >
      <h1>React Counter App</h1>
      <h2>Count: {count}</h2>
      <div>
        <button
          style={{ margin: "0 5px", padding: "10px 20px", fontSize: "16px" }}
          onClick={increment}
        >
          Increment
        </button>
        <button
          style={{ margin: "0 5px", padding: "10px 20px", fontSize: "16px" }}
          onClick={decrement}
        >
          Decrement
        </button>
        <button
          style={{ margin: "0 5px", padding: "10px 20px", fontSize: "16px" }}
          onClick={reset}
        >
          Reset
        </button>
      </div>
    </div>
  );
}

export default App;
```

React Counter App

Count: 0

Increment | Decrement | Reset

React Counter App

Count: 4

Increment Decrement Reset

React Counter App

Count: 2

Increment Decrement Reset
